Sacramento, California 95829

EMPLOYMENT HISTORY

01/2017 - Present

Lead Web Developer

TheFestivalVoice

Start up environment where I had many hats in design, software development, and delivery. Motivation and team building/leadership were key, as I was leading general and technical project management, product marketing and management. It was an overall product owner position, with a lot of coding and design. Vue was used, along with AWS on the back end.

10/2014 - 01/2017

Front End Engineer

Sixity

-Year 1 was designing the website on photoshop with my part time designer, setting up ad accounts, building our CSV of products, and making a new logo.

We then built it out in the course of 3 months, A/B tested the site across 5/6 different changes, marketed the website to companies that could help us gain market share, managed SEO and alternated keywords for our locale and industry.

-Year 2 I made custom plugins on wordpress, learned jquery and used it to update animations, and interactions. Searched out and used plugins to manage loyalty customers, added drop shipped items, and started working then completed our click funnels to link back to our site.

- Year 3 I took some time off for a long vacation, and started to learn REACT to scale our site/make it faster. I started making internal sites for admins to start making minor changes, like price, sales, pictures, and copy. I also started the redesign around this time. Around the end I trained my replacement as I was leaving.

EDUCATION HISTORY

06/2018

**Computer Science,
Associate Degree**

Lambda School

Special program that taught the basics of computer science; algorithms, data languages, database types, along with new technologies to get into web development.

PROJECTS

06/2018 -

SafeSpace

App Developer

Developing prototypes for a React Native project, built a news feed, profile, and chat components. The concept is mental health oriented, allowing peers or therapists to provide counseling or coaching! I managed all phases of the software development lifecycle so far.

12/2016 - 07/2017

Indiangrillwaikiki.com

Website Developer

Established online reputation for Indian Grill Waikiki and was contracted to produce an optimal balance of speed, design, features, and ease of customization.

I built a CMS portal for the owner, React through gatsby.js to make it load within 1.6 seconds, and analytics in the same portal.

SKILLS & ABILITIES

JavaScript

HTML5

CSS3

React.js

Vue.js

Python
